

5!

FIVE CRUCIAL DECADES OF CITY BUILDING

URBAN DESIGN FORUM
UBC School of
Architecture and
Landscape Architecture

Greater Vancouver is simultaneously at the leading edge of the global urban tsunami, and being overturned by it. Our forum will reveal the processes that are upending our own city and the processes fueling the metastatic growth of cities far distant.

"It is a remarkable thing. We are now witnessing the fastest transformation of human habitat ever. All over the world, countrysides are emptying while cities burst. Remarkably, as cities fill the average number of birth per woman shrinks. Thus, within the next five decades, the average city will double in size, then stop growing—potentially forever."
PATRICK M. CONDON,
5! Five Crucial Decades of City Building

a place of mind
THE UNIVERSITY OF BRITISH COLUMBIA

KICK OFF LECTURE

TUESDAY, NOVEMBER 4

DOUG SAUNDERS

Author of *Arrival Cities* and International Affairs Columnist, *Globe and Mail*, Toronto
